

Virtue Reflection

Name: Carlos A. Moreno

We will be talking about many qualities needed by professionals in different fields. Which one(s) of these qualities or virtues would you like to work on? Keep track of your progress throughout the class and turn this in on the last day. Also upload it to your e-portfolio.

At the beginning of the class you were challenged to practice a virtue. Tell what virtue you selected to practice and why you selected that virtue:

I selected "Perseverance" because I always had problems finishing my goal but in USA I am learning to be perseverant with the Language with my classes with my family goals etc. know that I can overcome everything that I need If I have perseverance in my life .

Relate your progress as you practiced your virtue:

When I was looking material to read about "Perseverance" I found this special quote of Spencer W. Kimball: "It's not possible that the problems of this world be resolved by the pessimists and skeptics whose horizons are guided by the obvious realities. We need men and women who think of things that have never been thought of and who dream of things that have never been dreamed of, and who ask, "Why not?" I am reading too much about perseverance and why is important!! Also I set up a goal when I promised to finish everything that I start no matter if I am tired or frustrated.

Were you satisfied with your progress? Why of why not?

Yes!!! Because in the beginning of this semester I promised me to pass Math!! I have failed math 2 times the last two semester, I had to work during the night, morning, afternoon because I needed it to pass that class to move forward!! 2 week before the semester finished I was done ☺.
